Honorable Phil Segraves
Mayor
P.O. Box 249
Guin, AL. 35563

Dear Mayor Segraves,

I am forwarding this letter to assist the town in its efforts to have Guin's Industrial site on Interstate 22 an Advantage Site. We certainly appreciate your efforts in preparing for industrial clients that will surely locate there. By being an Advantage Site, will give them the confidence to do so.

Tombigbee Electric Cooperative currently has a three phase 12,470 volt constructed to the Guin Industrial site. Extensions from this existing three phase line may be made in a matter of weeks once information is obtained from a prospect and their commitment to locate is secured.

In addition to the existing 12,470 three phase line on site, an 46,000 volt three phase could be constructed to the site which is located approximately three miles away. Such construction depends on obtaining necessary right of ways and could take an approximate time of 18 to 24 months to construct. A 161,000 volt transmission line could also be constructed which is approximately 5 miles away and would take an approximate time of 24 to 36 months to construct. Any unforeseen environmental or engineering issues could delay construction times. Service being provided with these higher voltages would depend on industrial requirements and the size of the industrial load.

Construction times can vary. Tombigbee Electric Cooperative will do all in its power to meet the needs of any electrical customer's time frame. We look forward to helping you and any future industrial prospect that will locate there. Please call on us if we can provide any additional assistance.

Sincerely,

Steve Foshee
CEO
