Re: Natural gas service at the Guin Interstate Site 44, 1000 feet
South of Interstate 22, Exit 26

Dear Phil:

The Northwest Alabama Gas District has a 4", 30 psi distribution line adjacent to the site along Highway 44, which is capable of supplying 15,000 cft/hr. Service can be made available from this line within 30 days.

Within 3.5 miles and along Highway 129 at Exit 30, is a 6" high pressure line with pressure ranging from 250 psi to 322 psi. This line can be tapped and extended to the Guin Interstate Site within 6-months of a request for service and will have a capacity of 300,000 cft/hr at the same pressures.

The District would be pleased to furnish natural gas to any industry or business in the area.

Sincerely yours,
NORTHWEST ALABAMA GAS DISTRICT

Jerry W. Self
